## DETAILED ACTION

### *Election/Restrictions*

1. Restriction is required under 35 U.S.C. 121 and 372.

This application contains the following inventions or groups of inventions which are not so linked as to form a single general inventive concept under PCT Rule 13.1.

In accordance with 37 CFR 1.499, applicant is required, in reply to this action, to elect a single invention to which the claims must be restricted.

Group I, represented by claims 1-13 and 25-35, drawn to an optical connector arrangement (and method of manufacturing) comprising a surface component for collecting radiation emitted from the surface of the substrate.

Group II, represented by claims 14-21 drawn to an embedded connector component for embedding in a substrate and/or for use in a surface connector component.

Group III, represented by claims 22-24, drawn to a panel for a vehicle fuselage.

The three inventions do not share a common special technical feature, such as a surface component for collecting radiation emitted from the surface of the substrate.

2. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
